## MAPS

Maps of Rosemere Cemetery presented on the next two pages were created for the purpose of the survey which accumulated the epitaphs in this collection. The maps are not official maps intended only to meet the needs of the survey in avoiding duplication and omission of information on existing epitaphs. They are presented here with the thought that they be helpful to any who wish to visit the site of graves with which they are not familiar.

Beginning points for each block, terrace or section were always in the northeast corner. First listed epitaphs should be easy to locate. The survey continued southward the width of the family plots, returning to the north side of the block or section.

Rosemere Cemetery  
Opelika, Alabama

by

Robert C. Horn and Mrs. John R. Fuller

*Rosemere Cemetery of Opelika contains burial sites for some of the earliest and most prominent leaders of east-central Alabama. The cemetery is well designed and maintained. It consists of three sections: (1) East of Long Street, a triangle, is the oldest, (2) West of Long Street, and (3) The Colored Cemetery in the southwestern part. It is laid out in squares about 90 feet on each side. Ample room is provided for moving to and from any block with wheeled vehicles.*

*In this collection each block has been assigned a number indicated on the map. With aid of the map provided, any grave may be quickly located. The date indicated for each block is the first-visit date for voice recording. After the transcription was made Mrs. Fuller, a long-time resident of Opelika and a genealogist made other visits to verify and correct information. As opportunity came new epitaphs placed in the cemetery were added. Epitaphs have been edited to show the full name in capital letters on the first line.*
